

December 2022

Renovation Update

All plans are going well for our full infrastructure project!

As promised we wanted to keep you up-to-date on our progress.

To date, we have received:

- 4 tractor trailer loads of Insulation which goes between the sand/sub floor heating and the refrigeration pipes/cement rink floor.
- We have also received pallets of "chair rails" which hold the refrigeration pipes in place.
- Rolls of foam spacers which go between the outside cement foundation and the inside monolithic poured rink floor.
- All Chiller components are now in stock in Minnesota and the chiller build has begun.
- New Boards and Benches are in production
- Expecting new Desiccant Dehumidifier in January
- Expecting several tractor trailers of refrigeration piping in January

We are actively working on the pricing and purchasing of:

- New Exterior Doors
- Paint for the Rinks, Locker Rooms and Bathrooms
- New Score Boards
- New Ice Resurfacers
- New Propane Fill Station for the Ice Resurfacers
- New Stand Heaters
- Moving of the Co-Generator and Back Up Generator
- New Coin Lockers
- Faster Speed Wi-Fi

We have talked to our friends at Long Island Sports Network and we will be hooking up two live streaming camera's so people can log on anytime and see the progress real time.

Unfortunately, when business go through projects or situations like this the "rumor" mill runs wild...
Just to be clear:

- We will begin this project Midnight Monday morning February 20th.
- Our Ice Programing will begin no later than June 15th.
- We WILL have Hockey Camp and Day Camp this summer.
- We also have secured ice for the 2023-2024 tryouts!

If you have ANY questions and want the straight scoop, please feel free to call or email us!!

We will keep you informed as we move along.

Have a Merry Christmas and a Very Happy and Healthy New Year
